Top-down Process

- Employs a multi-factor (smart beta) approach to country-allocation
- Analyzes over 60 developed and emerging markets
- Evaluates country equity valuations, macroeconomic growth catalysts, monetary policy profiles, and indicators of momentum
- Identifies key macroeconomic risks, including currency overvaluation, excess credit growth, and market volatility

Bottom-up Process

- Utilizes a multi-factor (smart beta) approach to stock selection
- Assesses over 7,500 equities across the globe
- Focuses on company valuations, cash flows, earnings quality, management policy, and momentum
- Allocates to most attractive sectors and stocks within each market/region

Portfolio Construction

- Optimizes portfolio by bringing together top-down and bottom-up analyses
- Maximizes expected alpha subject to risk controls
- Limits systematic market risks, such as excessive exposures to particular countries, sectors and market capitalization segments
- Adheres to a strict sell discipline

*GIPS® verification for 2018 is pending and will be completed by June 30, 2019.

**Composite and benchmark performance are for the period from May 1, 2014 through December 31, 2014.

N.A.1 - Information is not statistically meaningful due to an insufficient number of portfolios in the composite for the entire year.

N.A.2 - The three-year annualized standard deviation measures the variability of the composite and the benchmark returns over the preceding 36-month period. The three-year annualized standard deviation is not presented for 2014 through 2016 due to less than 36 months of composite and benchmark data.

International Equity Composite

- **Composite Description:** The International strategy invests in equities in developed (excluding the U.S.) and emerging markets. The investment process starts with a disciplined top-down multi-factor country allocation process. It then invests in stocks in most markets based on a quantitative multi-factor bottom-up stock selection process. The strategy invests in local shares, ETFs, and ADRs.
- **Creation Date:** The composite's creation date was September 1, 2017. The composites inception date was May 1, 2014.
- **Benchmark:** MSCI ACWI ex-US (net of estimated dividend withholding taxes). The benchmark is a market capitalization weighted index designed to provide a broad measure of equity-market performance in developed and emerging markets outside the United States.
- **Minimum Account size:** \$100,000.
- **Significant Cash Flow Policy:** Composite policy requires the temporary removal of any account incurring a client initiated significant cash inflow or outflow of at least 20% of the account value. The temporary removal of such an account occurs at the beginning of the month in which the significant cash flow occurs, and the account re-enters the composite in the beginning of the following month.

Disclosures

The GIPS®-compliant firm is defined as DCM Advisors Institutional ("DCMI"), the institutional investment management business of DCM Advisors, LLC ("DCM"). DCM is a registered investment adviser with United States Securities and Exchange Commission in accordance with the Investment Advisers Act of 1940.

DCMI claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. DCMI has been independently verified for the periods September 1, 2017 to December 31, 2017. The verification reports are available upon request. GIPS® verification for 2018 is pending and will be completed June 30, 2019.

Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. Verification does not ensure the accuracy of any specific composite presentation.

A list of composite descriptions is available upon request.

International Equity Strategy

The U.S. Dollar is the currency used to express performance. Returns are presented gross and net of management fees and include the reinvestment of all income. Net of fee returns are calculated using gross returns less trading expenses and taxes withheld on non-U.S. dividend payments. Net of fee performance was calculated using actual management fees. The annual composite dispersion presented is an equal-weighted standard deviation calculated for the accounts in the composite the entire year. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request.

The investment management fee schedule for the International Equity strategy is 1.00% on the first \$5 million, 0.80% on the next \$15 million, and 0.60% on the remainder. Actual investment advisory fees incurred by clients may vary.
